Dear FCC,

If you just stop to think about it, you should reject the National Association of Broadcasters petition 04-160. Satellite radio is a subscription service and like other "pay per" services it's content should be left up to the subscribers and the company. Please don't trample on satellite radio's free speech. Look at history, do the right thing, and reject the NAB's petition 04-160. Everyone can then relax and enjoy the entertainment of their choice.

Sincerely,

Michael Dickey
